

List of Practical's

- 1 Refraction through glass slab
- 2 Deviation by a prism
- 3 Focal length of concave mirror by parallax method
- 4 To measure angle of deviation (δ) through different angles of prisms.
- 5 Focal length of convex lens by plane mirror method
- 6 Verification of Ohm's law
- 7 Lever
- 8 Focal length of convex lens by parallax method
- 9 Verification of combination (Series) of resistances
- 10 Meter bridge
